

CERTIFICATE

for

Weingut Hans Wirsching KG
Ludwigstr. 16
DE-97346 Iphofen

We hereby confirm that the above mentioned business is a member of the FAIR and GREEN e.V. since August 01, 2019 and thereby subject to an annual audit in accordance to the FAIR'N GREEN-standards for sustainable winemaking.

The most recent sustainability audit on September 20, 2019 has been completed successfully. The winery has furthermore set itself mandatory targets to improve its sustainability performance. The result of the sustainability audit has been validated by an independent third party (GUTcert GmbH). The business is hence entitled to label all wine products that were cultivated in accordance to the FAIR'N GREEN standard with the FAIR'N GREEN seal. These are all estate wines since the vintage 2019.

This certificate is valid until revoked or the issuance of a new certificate however no longer than November 05, 2020.

Bonn, November 06, 2019

Signature FAIR and GREEN e.V.

Certificate for Sustainable Viticulture

FAIR'N GREEN is the seal of sustainable viticulture. It helps winegrowers to objectively measure and verify sustainability goals (e.g. reduction of CO2 emissions, higher biodiversity, social commitment) and to achieve them collectively. Consumers recognize the sustainable wines by the label on the bottle and can thus choose a sustainable product.

The FAIR'N GREEN Sustainable Viticulture Standard mandates each winery to set up processes to steadily improve its overall operations management, work in the vineyard, cellar management and marketing as part of a holistic sustainability approach. To achieve this all companies are given continuous advice and for each winery, an individual development plan is developed as part of the certification. In addition, further analyzes (e.g. life cycle assessment, carbon footprint) are carried out. As entry requirement, businesses have to reach 50% of the points in order to be able to seal the seal, and then improve annually by three percent. Independent institutes ensure the correctness of the certification according to scientific standards. We rely on a combination of consulting, testing and certification. Consulting and certification are divided into independent organizations.

FAIR'N GREEN means:

- Environmental protection and natural viticulture
- Promoting biodiversity
- Protection of natural resources
- Fair wages and social commitment
- Social responsibility
- Preservation and promotion of the cultural landscape
